SUMMARY

Full-stack software engineer with expertise in building scalable front-end architectures, API integrations, and backend services using modern frameworks such as React.js, Next.js, and Ruby on Rails. Committed to delivering high-quality, performant applications through clean, maintainable code and innovative problem-solving.

EXPERIENCE

Software Engineer, SendKits

Feb 2024 - Current

Full-stack developer for digital sales room software

- Built a custom embedded content viewer for displaying documents and media within the app.
- Implemented a file proxying system to improve security when serving assets from AWS S3.
- Engineered an AWS Lambda function to generate and store thumbnail images.
- Built a user onboarding flow and integrated it with Stripe for seamless payment processing.
- Developed an image cropping feature to enable users to customize and edit images directly in the browser.

Software Engineering Intern, ThreadCloud

Aug 2023 - Feb 2024

Full-stack developer for project management software

- Built and optimized UI components to add new features, improve user experience, and resolve bugs.
- Implemented interactive dashboards and data visualizations to help users track project progress.
- Developed RESTful APIs to handle data processing and implement business logic.
- Assisted in database schema design and implemented changes to meet application requirements.

EDUCATION

B.S., Computer Science

Dec 2024

Oregon State University

Ph.D., Earth Science

June 2023

University of California, Santa Barbara

SKILLS
